General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. General relativity generalizes special relativity and Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time ...

In general relativity, a geodesic generalizes the notion of a "straight line" to curved spacetime. Importantly, the world line of a particle free from all external, non-gravitational force, is a particular type of geodesic. In other words, a freely moving or falling particle always moves along a geodesic. In general relativity, gravity can be regarded as not a force but a consequence of a ...

Einführung. Grundlegend für die allgemeine Relativitätstheorie ist eine Wechselwirkung zwischen allen Typen physikalischer Systeme, die Energie und Impuls tragen können (Materie), und der Raumzeit mit zwei Eigenschaften: . Energie und Impuls der Materie beeinflussen die Geometrie der Raumzeit, in der sie sich befinden.

Lo spazio-tempo di Schwarzschild, è una soluzione delle equazioni di campo di Einstein nel vuoto, che descrive lo spazio-tempo attorno a una massa sferica, non rotante e priva di carica elettrica. È stata la prima soluzione trovata per la relatività generale, pochi mesi dopo la sua pubblicazione.

I've been trying to delve deeper into predictive processing theories of the brain, and I keep coming across Karl Friston's work on "free energy". At first I felt bad for not understanding this. Then I realized I wasn't alone. There's an entire not-understanding-Karl-Friston internet fandom, complete with its own parody Twitter account and Markov blanket memes.
